STATE WATER RESOURCES CONTROL BOARD  
**DIVISION OF WATER RIGHTS**  
**ORDER**

APPLICATION 18081 PERMIT 11591 LICENSE 7130

**ORDER APPROVING CHANGES IN THE POINT OF DIVERSION UNDER  
THE KUNDE PARTNERSHIP'S APPROPRIATIVE WATER RIGHT  
LICENSE 7130 (APPLICATION 18081)**

**WHEREAS:**

1. License 7130 was issued to the Kunde Partnership and was recorded with the County Recorder of Sonoma on January 15, 1965.
2. The Kunde Partnership filed a petition to correct the location of the Point of Diversion (POD) with the State Water Resources Control Board (SWRCB) on March 27, 1997.
3. The SWRCB has determined the petition to correct the location of the POD does not constitute the initiation of a new right, increase the amount of water the petitioner is entitled to use or injure any other lawful user of water.
4. The license condition pertaining to the continuing authority of the SWRCB should be updated to conform to the current version as contained in Section 780(a), Title 23, California Code of Regulations.

**NOW, THEREFORE, IT IS ORDERED THAT:**

1. The description of the point of diversion is corrected to read as follows:

California Coordinate System, Zone 2, N 266,000 and E 1,848,350 being within the SE¼ of NW¼ of projected Section 4, T6N, R6W, MDB&M.

2. The continuing authority condition is amended to read as follows:

Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this license including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the SWRCB in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.

The continuing authority of the SWRCB may be exercised by imposing specific requirements over and above those contained in this license with a view to eliminating waste of water and to meeting the reasonable water requirements of licensee without unreasonable draft on the source. Licensee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to:

(1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the SWRCB determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the SWRCB also may be exercised by imposing further limitations on the diversion and use of water by the licensee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the SWRCB determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.
